

In Memoriam: Rick Hall, MSc.

It is with great sadness that we announce the passing of Rick Hall, co-inventor of AFX and Co-Founder/Principal Scientist of Progressive Health Innovations.

Rick was a passionate force behind the creation of AFX. He cared deeply about creating a device built on proven science that did not compromise quality or performance. He tirelessly combed through volumes of academic and clinical journals to ensure that AFX could meet the most challenging prognoses. He also spent countless hours creating and testing innovative new approaches to physical rehabilitation and performance. To his credit, many of those approaches are becoming common practice in some of the leading sports and rehab clinics across the globe.

Rick found immeasurable satisfaction in inventing and finding solutions that helped people lead better lives. We feel honored that we got to share in Rick's journey and he will be greatly missed by the entire AFX team.

Rick's other great passion in life was his family. He was a beloved son, nephew, brother, uncle and cousin, who has left those he loved far too soon. We extend our heartfelt condolences to his family and wish them comfort during this very difficult time.

Matt Ferguson & Jordan Myers
